

there is only one medium

i envision experience

in order to connect minds

the human mind

i learn to create it

to themselves

some tools i use:

rigor¹

invention²

narrative³

¹ **Rigor** – Everything I design is modular and reusable, from lab methodology to educational systems. This foundation of control supports the inventive approaches that follow.

² **Invention** – Boundless experimentation connects naturally to narrative. Every workflow, camera, or AI pipeline is a prototype that tests ideas and informs the stories I craft.

³ **Narrative** – Guiding audiences through experience requires clarity. Narrative integrates rigor and invention, transforming complex systems into accessible human stories.

Capability Atlas: Integrated Practice

Program Coordination

Cosi | McGraw-Hill | AMNH

30-60% YoY growth • 73+ courses coordinated • 1,800+ students served • 20+ educators managed • NGSS curriculum design

This experience informs event ops and media design, providing the procedural backbone for further innovation.

Event Ops & Management

Philips DePury | Gateway Film Center

50+ staff supervised • Large-scale logistics • Training materials design • Bar operations control

The operational knowledge here extends directly to scientific workflows, gallery production, and live narrative experiences.

Science & Analytics

OSU | MC² | LTS

Geological Sciences B.S. • Paleontology / microscopy • TEM, EDX, X-ray crystallography

Analytical rigor feeds invention, guiding the design of tools, media, and AI workflows.

Methodology

Interdisciplinary bridge • Role-segmented AI pipelines • Systems thinking • Pedagogic reflection

All prior domains converge here, producing reproducible, ethical, and adaptable methods.

Narrative & Media

Stage performance, public speaking, immersive storytelling • Media spokesperson • Science writing

Stories extend scientific rigor and inventive methods into public-facing experiences, linking cognition to engagement.

Art & Invention

JuliAnne Jonker | Burns Auction & Appraisal

Constraint-driven innovation, custom cameras, Transparecam • AI album production • Multilevel AI persona emulation

Artistic practice reinforces narrative and invention, closing the loop between ideas and experience.
