Interdisciplinary Program Architect | Creative Technologist
Museum Innovation

Cross-disciplinary leader specializing in *program orchestration*, *experiential design*, and *technical communication*. Possesses a rigorous scientific foundation (TEM, Geological Sciences) and a hands-on creative practice (Optics, Fabrication). Proven track record scaling programs (**30-60% annual growth** at AMNH) and leading large public-facing teams (**50+ staff** at Gateway Film Center). Applies iterative, constraint-driven methods ideal for Prototype's research and development mission.

Core Competencies & Prototype Focus

Expertise bridging complex technical systems (Unity/Unreal, custom code) with hands-on engagement, program scalability, and exhibition development.

- **Program Coordination & Scale:** Managed 20+ educators and programs serving 1,800+ students annually. Led cross-functional teams up to 50+ staff (Gateway Film Center).
- **Museum Event Operations:** Cofounder/Coordinator of *Science on Tap* (NYC/Columbus). Managed high-volume hospitality and event logistics.
- **Exhibition Curation Focus:** Expertise in museum-grade object handling and installation (Picasso, Van Gogh, Hirst at Phillips de Pury). Focus on process documentation and transparent display.
- **Creative Technology & Media:** AI-assisted creative workflows, prompt engineering, and cross-platform narrative integration (text, image, audio).
- **Experimental Design & Optics:** Designer and fabricator of custom camera systems (*Transparecam*, *Keeblerkam*). Hands-on analog darkroom and specialized imaging (X-ray film).
- **Technical Digital Fluency:** Conversant in coding logic for scripting/adaptation (Python, UNIX, C++, Visual Basic) and comfortable with HTML. Proficient in Adobe Suite, layout design, and digital asset tagging.
- **Rigor Iteration:** Scientific background (TEM, Geological Sciences) ensures methodological rigor, data discipline, and a "constraint-driven innovation" mindset.
- **Public Speaking:** Experienced presenter at major conferences (ASTC, ISTE, MakerFest) and TEDx-ready topics on spectacle and process.

AI Research & Experimental Methodology

Applied advanced computational thinking to creative and scientific R&D, reflecting Prototype's integration of digital platforms (Unity, Unreal, TouchDesigner) with conceptual modeling.

- **Strategic Orchestration:** Employs *Role-segmented collaboration* (e.g., Alberr for ideation, HoloJesu for protocols) and *PI-style directing* to manage AI as a junior co-author/lab tech.
- **Falsifiable Experiment Design:** Translates conceptual metaphors into falsifiable, low-budget optics and photography protocols that fit real-world hardware, emphasizing *Controls & logging* and *Pre-reg discipline*.
- **Reasoning & Narrative:** Utilizes *Teach-back as sanity check* and *Legitimacy-first transparency* when presenting AI-assisted content (e.g., in the podcasts **Debating AI** and **A Boxful of Light**).

Professional Experience

- **American Museum of Natural History (AMNH)** 2008 – 2021
Program Coordinator, Program Manager, Online Educator
Architected and managed online science programs (73+ courses) and youth initiatives, driving **30–60% year-over-year enrollment growth**. Mentored **20+ educators** and designed curricula for at-risk youth.
- **Gateway Film Center** 2018 – 2021
Manager of Engagement | Bar Manager, The Torpedo Room

Directed guest experience, compliance, and large-scale bar operations, supervising over **50 staff**. Coordinated media-focused events and developed training SOPs.

- **McGraw-Hill / Glencoe** 2006 – 2008
Assistant Editor, Middle School Science
Edited and developed national science curriculum, ensuring content alignment and managing author/production coordination.

- **COSI (Center of Science and Industry)** 1993 – 2008
Team Leader | Area Assistant | Presenter
Developed and performed **live science demonstrations** and managed exhibit-floor teams. Focused on pioneering interactive audience-engagement techniques.
- **Phillips de Pury & Company** 2008
Art Handler
Handled, packed, and installed high-value fine art, including works by *Picasso, Van Gogh, and Damien Hirst*, adhering to conservation and museum standards.
- **Laboratory Testing Services** 2008 – 2009
Transmission Electron Microscopist
Operated *TEM instrumentation* for sample analysis, supporting EDX/PLM workflows in industrial and academic settings.

Bachelor of Science in Geological Sciences

The Ohio State University, Columbus, OH — August 1999

Specialization in invertebrate paleontology under Dr. Stig Bergström. Focus on technical analysis (TEM) and meticulous documentation.

Certifications (Previously Held)

ServSafe Food Protection Manager (valid through Sept 2023) | eTIPS On Premise 3.0 (2022) | Techniques of Alcohol Management (2019)
